

The bigger cranes bring benefits

SINGLE GIRDER CRANE USED IN PIPE-MAKING WORKSHOP

“You have done a great job, expecting further cooperation in the future and welcome to visit us again.”

In modern industry, pipe plays an influential role with increasing importance. As heavy as the steel pipes, material handling will be a problem, so Crane Manufacturers WEIHUA comes to help. Crane Manufacturers WEIHUA has rich experience in providing material handling solutions, who had served various industries such as, steel industry, electric power, petrochemical engineering, mechanical manufacture, military project, warehouse and logistics, paper manufacture, and vehicle manufacture, etc. In the following, we will show you how Crane Manufacturers WEIHUA helps the pipe making factory to solve the material lifting problems.

It's a project contract company in Bangladesh, established in 1975, which has contracted more than 300 engineering projects, such as, pipe plant project, galvanizing

plant project etc. Besides, the company has several successful cooperation with Bangladesh government, which makes them more and more influential.

It's a new factory and the customer sent the workshop drawings to Crane Manufacturers WEIHUA, hoping Crane Manufacturers WEIHUA can provide an optimal material handling solution for their pipe making workshop.

On considering the lifting requirements and workshop conditions, Crane Manufacturers WEIHUA recommended them 8 sets overhead cranes and 1 set gantry crane.

Crane Manufacturers WEIHUA arranges engineers to customer site for installation and operator training and teaches them how to maintenance.

As a customer oriented company, Crane Manufacturers WEIHUA will excel itself to provide superior quality material handling equipment and crane services to meet the demands of customers. In order to provide you better services, Crane Manufacturers WEIHUA can provide overall crane services for all types of industries, and our main services includes crane project design, crane installation, lifetime maintenance, crane operating training, technical support, crane parts, and crane modernization, etc.

After signing contract with customers, Crane Manufacturers WEIHUA starts to manufacture, below is some pictures:
